

Junior Software Developer

Who We Are.

B3 is a team focused on bringing data and analytics to support decision making at the nexus of water, land and people. We deliver water intelligence through an intuitive web-based data analysis platform to oil and gas and other industries focused on water management. B3 is a full-stack data company from our proprietary data collection platform to our extensive data management processes and our built-from-the-ground-up platform.

B3 team members are passionate, caring, driven, innovative, curious, unique and friendly. We are passionate about our work and the people we work with. We work side-by-side with our customers to provide information for superior decision making and quality data to analyze in minutes!

The Role.

Within our IT organization, we have three main technical stacks – data collections, database development and web application development. As a Junior Software Engineer, you will be working in our data collections stack. You will be collecting requirements, writing data collections scripts, monitoring data collection jobs, and troubleshooting issues within the system. As you gain experience and programming skill, you will be tasked with making changes to the system itself under the guidance of a senior software engineer. You will be working side-by-side with an experienced team of software engineers and will participate in a very collaborative environment where continual learning and skill improvement will be a focus.

Qualifications/Skills.

- B.S. degree in Computer Science, Software Engineering or related discipline with a minimum GPA of 3.5.
- Technical internship experience.
- Passionate about solving technical related challenges and issues.
- Ability to work creatively and analytically in a problem-solving environment.

We are committed to an inclusive and diverse culture at B3. We welcome and encourage applications from individuals from all groups, including aboriginal, women, visible minorities, and persons with disabilities, regardless of race, ethnicity, sexual orientation, creed, family status, national origin, age and gender.

We thank all applications for showing an interest in this position. Only those selected for an interview will be contacted.
